Notes Concerning  
CATALINA CLAY PRODUCTS

4000

Catalina Island is unique in many respects. Not only is it a famous pleasure resort, but it also is rich in natural resources which are now being developed quite extensively. Much valuable silver, lead, and zinc ores have been extracted from its various mines. Two large rock quarries are in operation on the island and ship hundreds of tons of rock to the mainland, daily, for use in Los Angeles and near-by Beach cities.

Within the last few years, the clay industry has assumed much importance. The vast clay deposits have been opened and a large brick, tile, and pottery plant built at Pebbly Beach. All kinds of Mission roof tile, floor tile, glazed wall tile, brick, hollow tile, and beautifully colored glazed pottery-ware, are

manufactured at this plant. The superiority of Catalina Clay products has been recognized to the extent that these products are in such demand on the mainland.

Visitors to the Island find much pleasure in admiring the tile and pottery display on sale at the Catalina Products Shop in the new Casino Building. It is interesting to note that the massive red roof of this two million dollar building is covered entirely with Mission roof tile made on the island. Also, the tiled floors of the Promenade and Foyer as well as the glazed tile used on the soda fountains and rest rooms are all Catalina-made products.

Information regarding any of the clay products will be gladly sent upon request. A Catalina Clay Vase makes a wonderful souvenir of your trip to the Island or a beautiful gift for a friend. Prices reasonable.
